R Tutor Pilot: Quick Feedback

About 5 minutes. Rough answers are perfect — honest beats polite. Fill it in when you finish (or when you stop).

Name (optional): _____ Date: _____

1. Before this course, which best describes you?

☐ Never installed R ☐ Installed it, barely used it ☐ I've run R code others wrote, rarely my own
☐ I write my own R code regularly

2. How did each module feel? (one mark per row)

Module	Too easy	About right	Too hard	Didn't reach it
1. Introduction (install, RStudio)				
2. Basic code (packages, errors)				
3. Data (types, vectors, formulas)				
4. Clean up (dplyr, missing values)				
5. Plots (ggplot2, working habits)				
6. Model output (lm, R^2, RMSE)				

3. Did anything break or not respond (a button, a page, an error that seemed like the course's fault)?

☐ No ☐ Yes → where:

---

4. The "Ask the Tutor" chat was...

Not helpful 1 2 3 4 5 Very helpful ☐ I never opened it

Check any that happened: ☐ It just gave me the answer ☐ It said something wrong
☐ It was too slow

5. Did you look anything up outside the course (Google, ChatGPT, a friend)?

☐ No ☐ Yes → for what:

---

6. Could you now do these on your own, in real RStudio, without the course open?

☐ Read a CSV file into R ☐ Filter and summarize it ☐ Make a plot ☐ Fix an error message
☐ Read a model's output

7. Where would a screenshot, short video, or diagram have helped?

---

8. The most confusing part was:

---

9. If you could change one thing:

Thank you! Hand this back, or snap a photo of it and send it to me.
